Prairifire Crabapple ***Malus 'Prairifire'***

Description: One of the taller crabapples, this variety has a mature height of 15'-20' height with an almost equal spread of 10'-15'. Red buds open to dark red-purple flowers in mid to late spring. Red-purple fruit, about 1/2 inch, are enjoyed by birds and squirrels.

Habitat: Like other crabapples, this species should be grown in full sun with a moist, well-drained and acidic to neutral soil. An excellent crabapple for disease resistance. Hardiness zones 4-8.

Fun Facts: Use this vibrant ornamental to bring vivid spring color and attract birds and other wildlife to your garden.
